[VFSJFileChooser 0.0.4](#)

VFSJFileChooser 0.0.4 is available.

Notes: (0 comments)

[VFSJFileChooser 0.0.3 is out](#)

VFSJFileChooser 0.0.3 was released today. The most noticeable "feature" is speed when browsing local/remote files. The component now uses new icons to improve the UI and avoid strange behaviours when using a native look and feel. Many bugs have been resolved. (0 comments)

[VFSJFileChooser 0.0.2 is ready](#)

This is the third release of VFSJFileChooser(0.0.2) which has now a details view. The license has been changed from GPL to Apache.

Changes: (0 comments)

[VFSJFileChooser 0.0.1beta2 released](#)

The second beta of VFSJFileChooser is out. VFSJFileChooser is a Java Swing Component which allows you to browse both remote and local filesystems. It is based on Apache Commons VFS library. (1 comments)

[VFSJFileChooser 0.0.1beta1](#)

The first beta of VFSJFileChooser is out. It is a Java Swing component which can browse local or remote locations(smb, ftp, sftp, webdav and some more) (1 comments)
